

NCWIT RESOURCE CREATION

NCWIT Social Scientists

- Gather and summarize research findings
- Collect requests/ideas for new resources
- Prioritize using criteria
 - measurable results
 - high and quick impact
 - likely adoption

Content Creation

- Social scientist for oversight
- Content developer/manager
- Project team

Design and Publication

- Edit to NCWIT publication standards
- Design to NCWIT style

NCWIT Resources

- Well-researched
- Readable, easy-to-use
- Free to general public
- Strategically distributed

NCWIT Alliance Members and Computing Community

- Share evaluated local practices
- Assist with information gathering
- Use, review, and evaluate existing resources
- Request new resources

**The resource creation and publication process includes iterative feedback loops.*

How are NCWIT resources created?

Members of NCWIT Alliances, NCWIT staff, and other computing community stakeholders contribute evaluated local practices, submit ideas/suggestions, and request new resources. Out of the many contributions, submissions, and requests, NCWIT social scientists prioritize resources for creation. NCWIT social scientists collaborate with contributors to develop content. This content is designed by NCWIT staff and published for the general public.
